

Revolutionizing surgical safety through tracking

Ensuring patient safety through digital transformation

Tired of the time-consuming and error-prone process of manually tracking surgical sponges during procedures? SeeMyGauzes is here to help!

Gossypiboma

The risk of leaving surgical sponges inside patients is a real concern in hospitals. The manual process of counting and tracking sponges during procedures is prone to errors, which can result in serious harm to patients. Furthermore, this process can be time-consuming, causing delays in patient care and increasing staff workload.

Solution

SeeMyGauzes is a comprehensive solution designed to eliminate the risk of retained sponges and improve the efficiency of surgical procedures. SeeMyGauzes uses state-of-the-art technology to track sponges in real-time, providing accurate and reliable information to surgical staff. It is easy to use and we offer integration with existing surgical workflows.

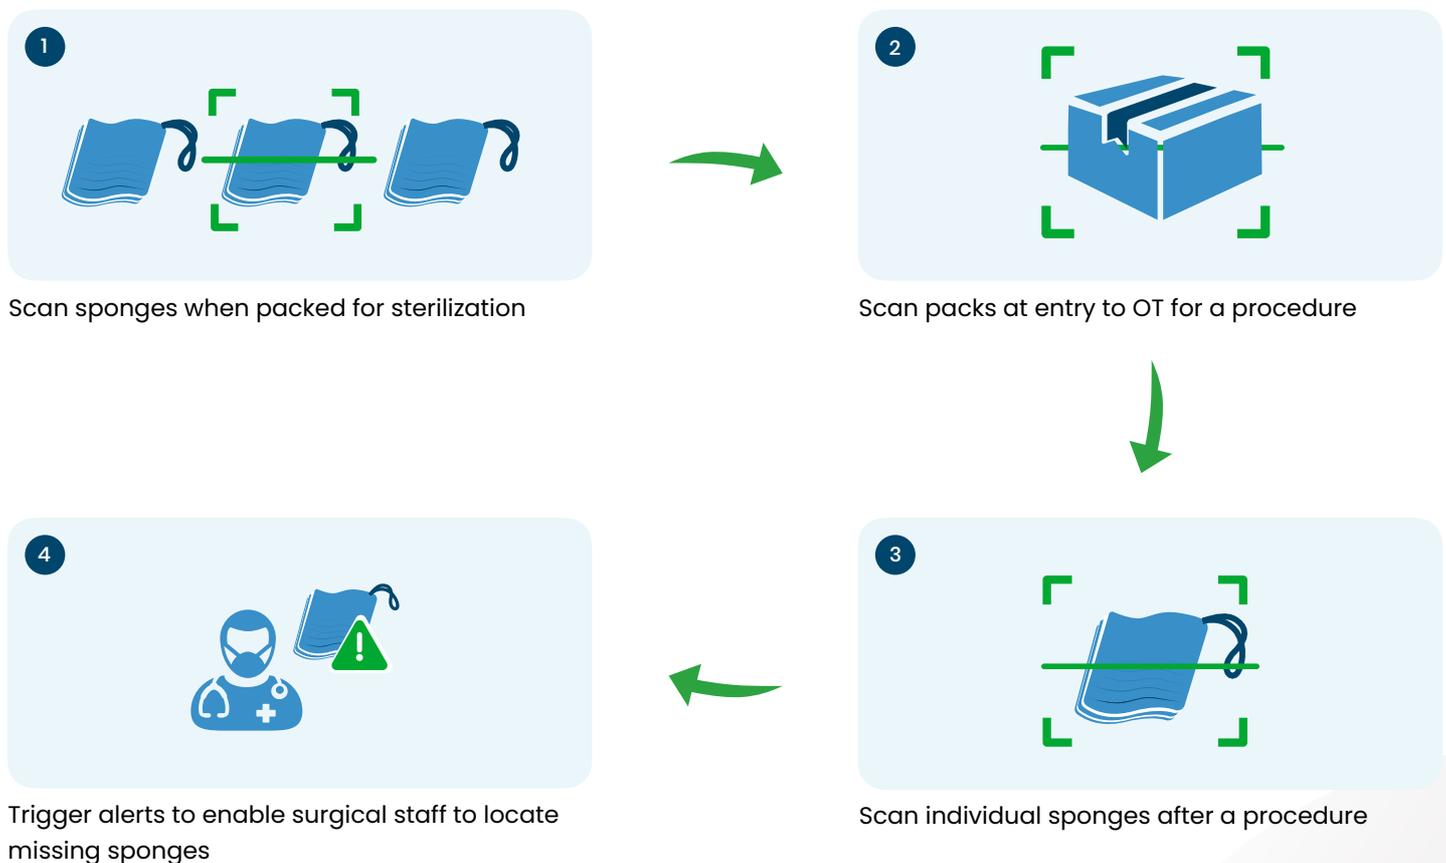

Solution Benefits

SeeMyGauzes provides numerous benefits to healthcare providers and their patients:

- Improved patient safety through accurate sponge tracking
- Increased efficiency during surgical procedures, reducing delays and freeing up staff time
- Enhanced surgical staff satisfaction by reducing the manual workload of counting and tracking sponges
- Reduced costs associated with retained sponges and potential legal claims

How it Works

SeeMyGauzes application utilizes Barcode technology and a user-friendly interface to provide real-time tracking of surgical sponges.

SeeMyGauzes is designed to improve patient safety, increase efficiency, and save valuable staff time.

SeeMyGauzes has won our clients multiple awards since its launch in 2022.

- **CAHOTECH 2022**
- **Best Health IT project of the year award** at The 10th International Conference on transforming Healthcare with IT
